Profile

I'm a Front-End Developer with a degree in Informatics Engineering. I specialize in creating and designing user interfaces for the web using technologies such as HTML5, CSS3, JavaScript, TypeScript, React.js/Next.js, among others. I also have experience conceptualizing web designs with Figma.

Additionally, I have worked on the Back-End to complement the Front-End with Node.js and occasionally on projects with WordPress. I am always open to learning new technologies, possess strong communication skills, and thrive both in team environments and independently.

Professional experience

Front-End Developer | Tecnosoftware | Hybrid | Full Time | January 2024 - Present

- Conducting multiple unit tests to validate proposed solutions before delivery.
- Resolution of issues related to flow logic in the company's internal framework.
