Profile

I am a Front-End Developer, holding a degree in Computer Engineering with a specialization in the layout and creation of user interfaces for the web using technologies such as React/Next.js. I also have experience in conceptualizing web designs using Figma. Additionally, I have worked on the Back-End side to complement the Front-End using Node.js, and occasionally, I engage in projects involving WordPress. I am always open to learning new technologies, possess strong communication skills, and excel both in team collaboration and individual work.

Professional experience

Front-End Developer | Tecnosoftware | Hybrid | Full Time | January 2024 - Present

- Development of custom solutions to create interfaces tailored to each client's needs.
- Resolution of issues related to the logic of the flow across different screens.
- Conducting multiple unit tests to validate proposed solutions before delivery to the client.
- Acquisition of skills in handling an in-house framework based on HTML, CSS, JavaScript, and JSON.

Front-End Developer | Freelance | Remote | Full Time | September 2023 - Present
Front-End Developer | Freelance | Remote | Full Time | September 2020 - April 2022

- I work in web development, both in WordPress and projects where I focus on front-end development using various technologies.
- I have implemented the use of Artificial Intelligence to create interactive chats, such as ChatGPT, on the web for specific projects.
- I handle front-end layout in various projects, working with technologies like React, Angular, Vue, among others.
- I have crafted functional and appealing websites using WordPress, along with the Elementor plugin, to create attractive landing pages and corporate pages for clients.
- I developed a custom WordPress theme by implementing HTML, CSS, JavaScript, and PHP, ensuring a consistent and optimized experience across all screens and devices.
- My focus has been on optimizing website performance, achieving fast loading times, and providing a smooth user experience.

Front-End Developer | MContigo | Remote | Full Time | April 2022 - June 2023

- I developed and designed various components, widgets, and screens for the article pages on MContigo's websites.
- I proposed and conceptualized designs for these elements using Figma.
- I carried out the layout of these elements using React in projects based on Next.js, following best coding practices.
- I collaborated closely with other developers and team members to advance various tasks and projects.
- I created up-to-date documentation for new team members, facilitating a seamless integration and effective knowledge transfer.

Studies / Certifications

Private University Dr. Rafael Belloso Chacín
Computer Engineering | January 2016 - November 2019

Private University Dr. Rafael Belloso Chacín
Webmaster Diploma | January 2019 - September 2019

React - Definitive Guide: Hooks Router Redux Next + Projects
Udemy, Nicolas Schurmann | January - 2022

Platzi - Various courses in Front-End Developer
Platzi | 2020 - 2023
