About

Front-End Engineer with 3+ years of professional experience building scalable web applications using React and Next.js. Focused on code quality, component-driven architecture, and modern user interfaces with AI integrations. Experienced collaborating with cross-functional and remote teams to deliver production-ready solutions.

Education

BS Rafael Bellosó Chacín University, Computer Engineering – Zulia, Venezuela Jan 2016 – Nov 2019

Experience

Front-End Engineer, TecnoSoftware – Buenos Aires, Argentina Jan 2024 – present

- Actively contribute to the evolution of the core front-end application, improving maintainability and technical consistency.
- Work within an established reusable component architecture, contributing continuous improvements to ensure consistency and scalability.
- Analyze and resolve UI bugs and inconsistencies, strengthening product stability and overall quality.
- Monitor front-end performance and collaborate during releases to ensure stability and reliability.
- Work closely with backend and product teams to ensure smooth feature implementations.

Front-End Engineer, Wiper Agency – Buenos Aires, Argentina Sept 2023 – Sept 2024

- Led the end-to-end front-end development using Next.js, defining technical standards and best practices.
- Built a production-ready web application featuring an AI-powered chatbot, integrating external APIs and managing conversational state logic.
- Improved application performance through efficient rendering strategies and structured architecture.
- Transformed complex Figma designs into high-fidelity, responsive interfaces ready for deployment.
- Contributed to architectural decisions to ensure scalability and maintainability.

Front-End Engineer, Group MContigo – Salamanca, Spain Apr 2022 – June 2023

- Developed reusable UI components using React to improve consistency and development efficiency.
- Delivered pixel-perfect interfaces based on Figma designs with a strong focus on UX principles.
- Applied Clean Code principles and front-end best practices to maintain a scalable codebase.
- Created and maintained technical documentation to streamline onboarding and team collaboration.

Skills

Front-End Engineering: JavaScript (ES6+), TypeScript, React, Next.js, HTML5, CSS3, Tailwind, Shadcn, Responsive Design

Performance & Architecture: Component-driven architecture, Rendering optimization, Code splitting, Clean Code, State management

APIs & Integrations: REST APIs, External API integration, AI-powered features, Authentication flows

Tools & Workflow: Git, GitHub, Vercel, CI/CD fundamentals, Figma, Chrome DevTools

Languages: English: Intermediate; Spanish: Native
